## FUNGICIDE

# HIGH VALUE PLUS SUPERLATIVE DISEASE CONTROL

Talaris<sup>™</sup> 4.5 F is a broad-spectrum fungicide which controls a variety of diseases in turf and ornamental crops. One of the most widely used fungicides in the world, thiophanate-methyl, the active ingredient in Talaris 4.5 F, works systemically to effectively protect turf and ornamentals.

The high-quality, flowable formulation of Talaris 4.5 F is easy to apply and is an excellent tank-mix partner. Talaris 4.5 F offers outstanding performance at an exceptional value.

#### **KEY BENEFITS**

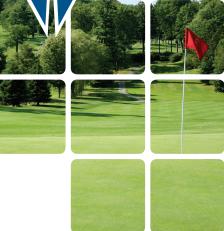

- Offers broad-spectrum protection against a wide range of turf
  and ornamental diseases
- Excellent, easy-to-use formulation
- Consistent, economical control

#### **KEY USES**

- Annual and perennial flowers
- Bedding
- Containerized woody shrubs
- Herbaceous foliage plants
- Shrubs

- Trees
- Turfgrass
  - Residential or public areas
  - Golf course tees
  - Golf course fairways

### **PRODUCT NOTES**

EPA REGISTRATION NUMBER 87373-10-91234

ACTIVE INGREDIENT Thiophanate-methyl 46.2%

FORMULATION Suspension Concentrate

FRAC NUMBER

SIGNAL WORD Caution

PACKAGE SIZE 2 x 2.5 gal 265 gal

RESTRICTED USE No

Refer to label for specific use restrictions.

#### **APPLICATION INFORMATION**

Apply Talaris 4.5 F with ground equipment in sufficient spray volume to provide thorough coverage.

#### **GREENHOUSE, NURSERY AND LANDSCAPE APPLICATIONS**

Apply 14 to 21 days before disease usually appears and at the very latest, at the first sign of disease. Spray intervals range from 7 to 14 days.

- Foliar spray rates: Use 8 to 20 fl oz per 100 gal of water, depending on target disease.
- Soil drench rates: Apply as a drench or directed spray using hand held, mechanical, or motorized spray equipment, or as a chemigation drench or directed spray using applicable sprinkler irrigation systems, after seeding or sticking of cuttings (8 fl oz) or after transplanting (12 to 16 fl oz) to propagation beds, containers, pots, trays, nursery or landscape beds at a rate to thoroughly soak the growing media through the root zone.
- Plant dip rates: Use 16 to 20 fl oz per 100 gal of water. Immerse plants or cuttings for 10 to 15 minutes; remove and allow to drain and dry.

#### **TURF APPLICATIONS**

Talaris 4.5 F can be applied to all cool- and warm-season grasses or their mixtures.

Rates: Use 1.75 to 5.33 fl oz per 1,000 sq ft.

#### **RESISTANCE MANAGEMENT**

To avoid the development of tolerant strains of fungi, Talaris 4.5 F should be used with fungicides of different modes of action. Atticus does not recommend the use of products containing thiabendazole in combination or rotation with Talaris 4.5 F. These utilize similar chemistry and modes of action and can contribute to development of disease tolerance.

Refer to product label for complete application and mixing instructions.
