

Contains hexythiazox, the active ingredient used in Savey® 50 DF.

INSECTICIDE

CLEVER™

50 DF

OUTWIT MITES THIS SEASON

Clever™ 50 DF offers a savvy approach to stopping the lifecycle of tetranychid mites on a wide range of tree crops and berries. Gentle on beneficial insects and demonstrating excellent crop safety, Clever 50 DF makes an excellent IPM program partner. Clever 50 DF controls both immature-stage mites and mite eggs, and later renders eggs unviable when deposited post-application.

Clever 50 DF miticide works on-contact to penetrate the leaf tissue and quickly reach mites across the plant surface. Clever 50 DF continues to hunt down mite activity with extended residual, providing a smart solution for long-lasting control of damaging mites.

KEY BENEFITS

- On-contact and extended residual control
- Easy on beneficial insects, safe for crops
- Stops immature mites and eggs
- Effective translaminar movement

KEY USES

- Apples
- Blackberries
- Dates
- Peaches
- Pecans
- Raspberries
- Strawberries

PRODUCT NOTES

EPA REGISTRATION NUMBER
91234-38

ACTIVE INGREDIENT
Hexythiazox 50%

FORMULATION
Water Dispersible Granule

IRAC NUMBER
10A

SIGNAL WORD
Caution

PACKAGE SIZE
10 x 12 wt oz

RESTRICTED USE
No

Refer to label for specific use restrictions.

APPLICATION INFORMATION

For best results, apply Clever™ 50 DF at the first sign of mites before adult mite build up. Use higher rates on moderate-to-high mite infestations, large trees with dense foliage, or for extended residual control. Lower rates may be used in conjunction with other IPM strategies, or for shorter residual control later in the season. It is not, however, recommended to use less than the label's rates since it will result in poor performance and contribute to resistance development.

If adult mites are present in medium-to-high populations, better results may be obtained using Clever 50 DF in combination with a registered contact adulticide. Clever 50 DF is highly compatible and may be tank-mixed with horticultural grade oil. Refer to all precautions regarding phytotoxicity on the oil label. Use sufficient spray volume to obtain thorough, uniform coverage. Do not make more than one application of Clever 50 DF per year. Always read and follow instructions on product label.

MIXING INSTRUCTIONS

Continuous agitation is required to keep the product in suspension.

- Turn on spray tank agitation. Pour recommended amount of this material on the surface of water in a nearly filled spray tank.
- Add balance of water to fill the tank.

TWO SPOTTED SPIDER MITE DAMAGE ON STRAWBERRY PLANTS

Location: California

Refer to product label for complete application and mixing instructions.
