

Contains halosulfuron-methyl, the active ingredient used in SedgeHammer® +.

## SELECTIVE HERBICIDE

# SUPERIOR CONTROL OF NUTGRASS

Get out of the weeds and reclaim viable turfgrass with the selective herbicidal power of Empero™ Q-Pak. Active ingredient Halosulfuron-methyl moves through the plant to affect underground growing points of weeds and sedges such as purple and yellow nutsedge, Kyllinga species and certain broadleaf weeds, offering highly effective nutgrass control while remaining gentle on turfgrass. Plus, it comes in a convenient pre-measured pack with a rapidly dissolving formulation for use in a backpack sprayer, making it an easy and efficient turf management option.

Empero is as versatile as it is easy to apply; maintain commercial and residential turfgrass as well as other non-crop sites including airports, campgrounds, cemeteries, established woody ornamentals in landscape areas, fairgrounds, fallow areas, fuel storage areas, golf courses, rights-of-ways, sports fields, and more.

### KEY BENEFITS

- Easy-to-use premeasured pack size for backpack sprayer
- Superior control of nutgrass
- Gentle on established turf & landscapes
- Rapidly dissolving formulation

### KEY USES

- Commercial & Residential
- Golf Courses
- Landscape Areas
- Turfgrass
- Non-Crop Areas
- Right-of-Ways

### PRODUCT NOTES

**EPA REGISTRATION NUMBER**  
91234-69

**ACTIVE INGREDIENT**  
Halosulfuron-methyl 5%

**FORMULATION**  
Water Dispersible Granule

**HRAC NUMBER**  
2

**SIGNAL WORD**  
Caution

**PACKAGE SIZE**  
12 x 13.5 gram  
108 x 2 x 13.5 gram

**RESTRICTED USE**  
No

Refer to label for specific use restrictions.

Relevant. Simple. Reliable.

## APPLICATION INFORMATION

Calibrate application equipment prior to application of this product. Application should be uniform and of sufficient volume to avoid streaking or skips. Empero Q-Pak often works with 1 application but depending on the size and age of the nutsedge a second treatment may be required 6 - 10 weeks after the initial treatment.

## BOOM-LESS GROUND APPLICATIONS

- Applicators are required to use a Medium or coarser droplet size (ASABE S572.1) for all applications.
- Do not apply when wind speeds exceed 10 miles per hour at the application site.
- Do not apply during temperature inversions.

## SPRAY DRIFT ADVISORIES

Boom-less Ground Applications:

- Setting nozzles at the lowest effective height will help to reduce the potential for spray drift.

Handheld Technology Applications:

- Take precautions to minimize spray drift.

## BEST PRACTICES

- For optimum results, do not mow turf for 2 days before or 2 days after application.
- Avoid applications when rainfall is forecasted to occur within 4 hours.
- This product may be used on established seeded, sodded, or sprigged turfgrass. Allow the turf to develop a good root system and uniform stand before application.
- Treated areas may be overseeded with annual or perennial ryegrass or bermudagrass, 2 weeks after application.
- Avoid application of Empero Q-Pak when turfgrass or nutsedge is under stress since turf injury and poor nutsedge control may result.
- Avoid excessive overlap of the spray.
- Annual and perennial herbaceous ornamentals, including color plants, may be injured when transplanted into landscaped areas treated with Empero Q-Pak.

*Refer to product label for complete application and mixing instructions.*
