Bootstrapped and ready to serve, we deliver battle-tested chemistries and an experience like no other. Proud to be 100% American-owned. our mission is to help you every step of the way.

Get ahead of weeds before they invade. SpiruS™, a selective pre-emergence herbicide, controls many annual grasses, certain annual broadleaf weeds, and yellow nutsedge. SpiruS can be used on commercial and residential warm-season turfgrass, nurseries, sod farms, and other noncropland. The active ingredient, S-metolachlor, is shootabsorbed and does not negatively affect turfgrass roots.

PRODUCT INFO

- Effective on a wide range of warm-season turfgrasses, including bermudagrass, St. Augustinegrass, zoysiagrass, and more
- The only active ingredient labeled for nutsedge in ornamentals plants that can be applied over-the-top
- Safe to use on a broad range of ornamental plants in field, container, and landscape settings
