### CARCINOGENICITY:

**EPA:** Group C: Possible Human Carcinogen (tebuconazole)

**ACGIH:** Not Listed **NTP:** Not Listed

**IARC:** Not Listed **OSHA:** Not Listed

**REPRODUCTIVE/ DEVELOPMENTAL TOXICITY:** Animal studies on tebuconazole resulted in decreased pup body weights and smaller litters at doses that were also toxic to mother animals. In animal studies with tebuconazole, developmental effects were observed at doses that were also toxic to the maternal animal.

**CHRONIC/CARCINOGENICITY:** Prolonged overexposure to tebuconazole may cause effects to liver, spleen, adrenals and/or eyes. Tebuconazole was not carcinogenic in a chronic feeding study in rats. In a mice study, there was an increased incidence of liver tumors at the highest dose tested, a dose exceeding the Maximum Tolerated Dose (MTD). EPA classified tebuconazole as a Group C (possible human carcinogen) chemical based on liver tumors.

**GENOTOXICITY:** Neither in vitro nor in vivo tests on tebuconazole demonstrated mutagenic effects.

## 12. ECOLOGICAL INFORMATION

This pesticide is toxic to estuarine and marine invertebrates.

The following information is for the active ingredient, Tebuconazole:

### AQUATIC TOXICITY

Fish: Rainbow Trout (96-hour LC<sub>50</sub>): 2.27 mg/L;

Fathead minnow (NOAEC): 0.011 mg/L

Daphnia magna (Water Flea) (48-hour EC<sub>50</sub>): 2.88 mg/L

Mysid shrimp (96-hr LC<sub>50</sub>): 0.49 mg/L; (NOAEC): 0.035 mg/L

Duckweed (EC<sub>50</sub>): 0.151 mg/L

### AVIAN TOXICITY

Bobwhite Quail (Oral LD<sub>50</sub>): 1,998 mg/kg

Mallard Duck (8-day Dietary LC<sub>50</sub>): >4,816 ppm

### ENVIRONMENTAL FATE

Tebuconazole is soluble in water. It is stable to hydrolysis and photolysis on soil and in water. The photolysis half-life of tebuconazole in soil averages 190 days and in water averages 590 days. Tebuconazole has a low to moderate mobility in soils. Absorption to soil increases as level of organic matter and clay increases.

## 13. DISPOSAL CONSIDERATIONS

**PESTICIDE DISPOSAL:** Pesticide spray mixture or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides. Improper disposal of excess pesticide spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by the use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Refer to the product label for specific container disposal instructions.

## 15. REGULATORY INFORMATION

### FIFRA –

This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. The following is the hazard information as required on the pesticide label:

#### PRECAUTIONARY STATEMENTS

##### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION** Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing vapor or spray mist. Remove and wash contaminated clothing before reuse. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

See inside label booklet for additional precautionary statements.

##### ENVIRONMENTAL HAZARDS

This pesticide is toxic to mammals, fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

##### Ground Water Advisory:

Tebuconazole is known to leach through soil into ground under certain conditions as a result of label use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground-water contamination.

##### Surface Water Advisory:

This product may contaminate water through drift of spray in wind. This product has a high potential for runoff for several months or more after application. Poorly draining soils and soils with shallow water tables are more prone to runoff that contains this product. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from rainfall-runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted within 48 hours.

All pesticides are governed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The regulatory information presented below is pertinent only when this product is handled outside of the normal use and application as a pesticide. This product is excluded from listing requirements under EPA/TSCA.
