Suspension Concentrate

IRAC NUMBER

3A, 15

SIGNAL WORD

Caution

PACKAGE SIZE

6 x 0.5 gal, 2 x 2.5 gal

RESTRICTED USE

No

Gardatis™ Pour-On is a ready-to-use formulation that protects cattle and horses against biting and sucking lice, flies, and ticks. It is approved for use on lactating and non-lactating dairy cattle, beef cattle, calves, horses, and foals. Gardatis Pour-On combines permethrin, diflubenzuron, and petroleum distillates to kill adult lice and lice eggs with just one application.

PRODUCT INFO

- Protects against biting and sucking lice, flies, and ticks
- Single application kills lice at multiple life cycle stages
- Zero-day pre-slaughter interval and milk discard time
- Prevents horn fly larvae emergence in manure of treated cattle
