The addition of 2% volume/volume 32 or 28% UAN (Urea-ammonium nitrate) to one of the above listed surfactants (except Concord, Dyne-A-Pak, Invade Xtra, Phase II, Pilot's Choice Tri Faze and Triple Play, which already contain UAN) is recommended and may enhance the activity of Artillery WSP when applied under some conditions. The addition of 32 or 28% UAN (Urea-ammonium nitrate) at 1% v/v to Persist and Volare adjuvants is required when used with Artillery WSP. UAN is NOT a substitute for an approved adjuvant, but rather should be used in combination with one of the approved adjuvants.
