

INSECTICIDE

ULTIMATE DEFENSE AGAINST MITES AND INSECTS

Batallion™ 2 EC, is the ultimate defense against mites, stink bugs, bollworms, moths, thrips and more. The active ingredient, bifenthrin, is absorbed through the insect cuticle and through insect ingestion for fast-acting relief from insect feeding. Apply this insecticide mid to late season for quick knockdown and lasting protection.

Due to its low water solubility Batallion 2 EC is not easily washed off with rainfall or irrigation. This all weather formula gives growers versatile application and extended residual. Plus, Batallion 2 EC makes an excellent tank mix partner. Take control of nurseries, ornamentals, lawns, and golf courses with the knockdown power of Batallion 2 EC.

KEY BENEFITS

- All weather formula is designed to protect yield for longer
- Flexible application — can be applied by air or ground
- Works through absorption and ingestion for quick insect knockdown

KEY USES

- Christmas Trees
- Interiorscapes
- Golf Courses
- Lawns
- Nurseries
- Ornamentals
- Sod Farms

PRODUCT NOTES

EPA REGISTRATION NUMBER
91234-104

ACTIVE INGREDIENT
Bifenthrin 25%

FORMULATION
Emulsifiable Concentrate

IRAC NUMBER
3A

SIGNAL WORD
Warning

PACKAGE SIZE
4 x 1 gal
265 gal

RESTRICTED USE
Yes

Refer to label for specific use restrictions.

Relevant. Simple. Reliable.

APPLICATION INFORMATION

The rate of Batallion 2 EC applied will vary according to pest pressure and timing of application. Use lower rates under light to moderate infestations and higher rates under heavy insect pressure and for mite control. Arid climates generally require higher rates.

Unless otherwise specified for a specific crop, apply when pest population reaches economic (damaging) threshold and repeat as necessary to maintain control. Thorough coverage is essential to achieve control.

BUFFER ZONE

Construct and maintain a minimum 10-foot-wide vegetative filter strip of grass or other permanent vegetation between the field edge and down gradient aquatic habitat (such as, but not limited to, lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries; and commercial fish farm ponds). Only apply products containing bifenthrin onto fields where a maintained vegetative buffer strip of at least 10 feet exists between the field and down gradient aquatic habitat.

CHEMIGATION USE

Apply this product only through sprinkler including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand move irrigation systems. Do not apply this product through any other type of irrigation system.

For sprinkler irrigation, meter Batallion 2 EC at a continuous uniform rate during the entire irrigation period. To ensure accurate application over the treated area, apply in sufficient volume of water or other diluent. If non-emulsified oil is used as the diluent, use 1 to 2 pints per acre. Maintain continuous agitation of the pesticide supply tank for the duration of the application period. When chemigation systems are used, 0.5 inch per acre of irrigation water is suggested except that for Low Energy Precision Application (LEPA) irrigation, a minimum of 0.75 inch of water per acre is suggested.

Refer to product label for complete application and mixing instructions.

Batallion™ 2 EC is an EPA Restricted Use Pesticide.
