# POWERFUL CONTROL OF UNWANTED VEGETATION

Cryder™ is a selective herbicide that is used for pre-emergent and post-emergent control of grassy and broadleaf weeds in a variety of non-crop areas that require bare ground vegetation management. The active ingredient sulfosulfuron exhibits systemic activity that absorbs into the root, offering a more lasting solution to weed control. Cryder protects industrial sites, roadsides and more from a wide range of stubborn pests like johnsongrass, cheatgrass, yellow and purple sedges and ragweed. With the power of Cryder, you can prevent grasses and weeds from sprouting or eliminate existing pests.

#### **KEY BENEFITS**

- Effective on difficult-to-control roadside weeds
- Numerous application sites
- Controls many weeds at low use rates

#### **KEY USES**

- Ditches
- Grasslands
- Industrial Sites
- Non-crop areas
- Pastures
- Railways
- Rangelands

#### **PRODUCT NOTES**

**EPA REGISTRATION NUMBER** 91234-119

**ACTIVE INGREDIENT**Sulfosulfuron 75%

**FORMULATION**Water Dispersible Granule

PACKAGE SIZE 10 x 2 wt oz 10 x 20 wt oz

RESTRICTED USE

Refer to label for specific use restrictions.

#### **USE SITES**

#### **NON-CROP**

Use this product for weed control on non-crop sites including airports, conservation areas, ditch banks, dry ditches, dry canals, fallow areas, fencerows, industrial sites, lumberyards, manufacturing sites, natural areas, petroleum tank farms and pumping installations, railroads, roadsides, storage areas, utility rights-of-way, utility sites and substations, warehouse areas and wildlife areas.

#### PASTURES AND RANGELAND

Use this product for weed control in pastures, hayfields and rangelands as defined in the product label. It can be used for weed control in perennial native grasses as defined on the product label.

**IMPORTANT:** Do not allow this product to contact roots or foliage of desirable vegetation, areas where roots of desirable vegetation may extend, or areas where this product may be washed or moved into contact with roots of desirable vegetation. Desirable plants may be injured if planted into treated areas.

#### **APPLICATION INFORMATION**

#### **EQUIPMENT AND TECHNIQUES**

Best results are obtained when weeds are actively growing and not disturbed by mowing for at least 14 days before and 14 days after application.

NON-CROP, PASTURES AND RANGELAND APPLICATION	
Ground Broadcast Application	<ul> <li>Apply this product uniformly with properly calibrated ground application equipment at rates specified on this label in 10 to 50 gallons of water per acre.</li> <li>Select spray volumes that ensure thorough and uniform weed coverage.</li> <li>Spray booms need to be equipped with nozzles that provide optimum spray distribution and uniform coverage at the appropriate spray pressure to minimize streaking, skips, overlaps and spray drift during application.</li> </ul>
Aerial Application	<ul> <li>Apply this product at rates specified on the product label in 5 to 15 gallons of water per acre when making aerial applications, unless otherwise specified.</li> </ul>
Hand-Held and High-Volume Application	<ul> <li>Hand-held spray guns, backpack sprayers and other similar types of sprayers may be used to apply this product.</li> <li>Follow the use directions for hand-held and high-volume application in the specific use sections of this label.</li> <li>Apply to foliage of vegetation to be controlled at a rate of approximately 2 gallons of spray solution per 1000 square feet. Spray coverage needs to be uniform and complete.</li> <li>Do not spray to the point of runoff. Use coarse sprays only.</li> </ul>

Refer to product label for complete application and mixing instructions.
