

SELECTIVE HERBICIDE

## POST-EMERGENT CONTROL OF GRASS & BROADLEAF WEEDS FOR VEGETATION MANAGEMENT

Tetrakis™ SG herbicide controls grass and broadleaf weeds in non-crop sites including industrial sites, roadsides, highway medians, utility substations, and airports. The active ingredient, rimsulfuron, is absorbed through the roots and foliage, providing post-emergent control and rainfastness within 4-hours of application for long-lasting residual activity. Tetrakis SG, a go-to herbicide with tank-mix compatibility, empowers professionals for swift and effective weed control. Use Tetrakis SG today to safeguard industrial vegetation management use sites.

### KEY BENEFITS

- Excellent post-emergent control
- Tank-mix compatible with other herbicides
- Broad range of application sites
- Rainfast within 4 hours

### KEY USES

- Airports
- Highways
- Industrial Sites
- Railways
- Rights-of-way
- Utility Substations

### PRODUCT NOTES

**EPA REGISTRATION NUMBER**  
91234-85

**ACTIVE INGREDIENT**  
Rimsulfuron 25%

**FORMULATION**  
Water Dispersible Granule

**HRAC NUMBER**  
2

**SIGNAL WORD**  
Caution

**PACKAGE SIZE**  
12 x 20 wt oz

**RESTRICTED USE**  
No

Refer to label for specific use restrictions.

Relevant. Simple. Reliable.

## NON-CROP APPLICATION INFORMATION

Apply 4 ounces broadcast per acre Tetris SG. Do not apply more than 4.0 ounces of Tetris SG per acre per year. For best pre-emergence and residual activity, Tetris SG must be activated by rainfall and applied when soil temperatures are cool. Make applications to take advantage of normal rainfall patterns (minimum of 1/2 inch) and cooler temperatures. For best results, moisture for activation must occur within 2 - 3 weeks after application. To help ensure uniform coverage, use a minimum of 10 gallons of spray solution per acre.

Tetris SG may be applied using ground or aerial spray equipment. Fixed wing aircraft and helicopters can be used to apply Tetris SG; however, do not make applications by fixed wing aircraft unless appropriate buffer zones can be maintained to prevent spray drift out of the target area or, when treating open tracts of land, spray drift as a result of fixed wing aircraft application can be tolerated.

## USE RESTRICTIONS

- Do not apply more than 4 ounces per acre in a single application.
- Do not exceed 4 ounces per acre in a year.
- Do not make more than 1 application per year.
- Do not apply Tetris SG when these conditions are identified and powdery, dry soil or light, or sandy soil is known to be prevalent in the area to be treated.

Pre-emergence use on soils containing more than 6% organic matter may result in reduced weed control. Avoid spray drift to any adjacent crops or planned crop planting areas or desirable plants since injury may occur.

Draining or flushing equipment on or near desirable trees or other plants or in areas where their roots may extend or in locations where the chemical may be washed or moved into contact with their roots may injure these plants.

Crops (especially crops other than pome fruit, tree nuts, stone fruit, citrus, grapes, potatoes, tomatoes, and field corn) whose roots may extend into a treated area may be injured.

Where food and/or feed crops are grown, or in areas where food and/or feed crops are planned to be grown, care must be taken to prevent any direct spray of Tetris SG onto, or drift to, these crops or planned planting areas since severe crop injury may occur. Do not contaminate any body of water, including irrigation water that may be used on other crops. Do not apply in or on irrigation ditches or canals including their outer banks. Do not apply when the soil is frozen.

If non-crop sites treated with Tetris SG are to be converted to an agriculture use, consult the Tetris SG package label for all rotational crop instructions.

## KEY WEEDS

Barnyardgrass  
Browne; downy, Japanese  
Cheat  
Crabgrass, large  
Filaree redstem  
Fleabane, hairy  
Foxtail; giant, green, yellow  
Mallow, common  
Medusahead  
Mustard, black  
Pigweed; redroot, smooth  
Puncturevine

*(Refer to product label for complete list)*
